## HOBBIES AND INTERESTS

### Drawing and writing comics

My biggest free time investment is creating a comic I have been working on now for quite a while. It requires a lot of patience and dedication. You have to write a script, storyboards and create concept art and the comic pages.

### Programming projects (Astronomy)

A big hobby of mine is learning things about astronomy. I like to combine this interest with programming projects. I made a digital starmap and a project about terraforming with the Three.js framework.
